👤 | Summary

Engineering Leader (ex-AWS, ex-CTO) 20+ years designing and scaling engineering teams and systems. Bridges business strategy and technical delivery, with a track record of shipping production-grade AI and cloud-native infrastructure for enterprise, government, and non-profit customers.

⚙️ | Skills

Leadership	Team leadership & scaling (CTO, 3 direct reports), interviewing & hiring, mentorship, Couchbase software trainer
AI/ML	RAG, agentic systems, LLM orchestration, Amazon Bedrock
Cloud	AWS (Prototyping Engineer), Azure (Solutions Architect Expert), OpenSearch, Neptune, large-scale migrations
Architecture	Distributed systems, technical strategy & roadmapping, full SDLC ownership, stakeholder management
Languages	C#/ .NET, TypeScript / Node, Python

👜 | Experience

- 2020–2026 ○ **Senior Software Engineer (SDE III)**, *Amazon Web Services (AWS)*, London
Delivered rapid Proof-of-Concept solutions for Public Sector customers as a forward-deployed engineer on the Envision Engineering team, helping them evaluate and adopt AWS cloud technology.
Highlights:
- Scaled the Envision Engineering team's hiring throughput as an active interviewer, conducting 30+ technical and behavioural interviews and mentoring 5+ new hires.
 - Tech Lead for a team of 3, delivering a 0→1 AI classroom simulator for Steplab in 10 weeks — enabling teacher training at scale and securing a wider partnership by architecting a high-velocity prototyping framework on Amazon Bedrock.
 - Directed a cross-functional team of 3 as Tech Lead, orchestrating the integration of generative AI and VR to deliver a first-of-its-kind AI judge training platform for the Swedish National Courts — resulting in national deployment and widespread media coverage (e.g., "Sweden trains future judges with AI and VR").
 - Prototyped a predictive AI model for The Ocean Cleanup on Amazon Bedrock, leading a team of 4 as Tech Lead — resulting in a high-profile multi-year partnership between AWS and the non-profit.
 - Architected a high-precision medical knowledge categorisation system for NICE with a team of 5 (Tech Lead), automating complex manual workflows through a RAG-based deployment across OpenSearch and Neptune.
- 2019–2020 ○ **Senior Software Engineer (contract)**, *McLaren Applied Technologies*, London
Co-architected and co-developed multiple Angular+NodeJS+.NET Core applications.
Frameworks/Languages: Angular (v9), NodeJS, .NET Core, SignalR, RxJS (Reactive extensions for JS), NgRx (State manager), NestJS (API Framework for Node), Angular Schematics, TypeScript, C#
- 2014–2019 ○ **Chief Architect & CTO, Co-Founder**, *Magnitude Internet*, Germany
Co-founded and served as CTO, growing the company to 10 people with 3 engineers reporting directly, while designing the Azure-based cloud architecture and CI/CD culture for a German e-commerce startup and delivering a multi-tiered product that supported millions of users. Run part-time and remotely, alongside the contract engagements below.

- 2018–2019 **Senior Software Engineer (contract)**, *Invenias by Bullhorn*, Reading
 Re-architect and upgrade an existing Angular+.NET solution.
 The requirements had outgrown the architectural capabilities of the current application, I suggested a new architecture using client-side state management and server-side push and outlined the migration path that enabled us to do the overhaul while continuing to add features to the software.
- 2017–2018 **Senior Software Engineer (contract)**, *Fiserv*, Slough
 Re-implementation of Risk Assessment Software in Angular 5.
 Tools/Languages: C#, WebAPI, Angular (v5), RxJS (Reactive extensions for JS), ngrx/store (State manager), Visual Studio 2015, Visual Studio Code, MS SQL Server.
- 2015–2017 **Senior Software Engineer**, *Knight Frank*, London
 Extending and updating Knight Frank's web presence.
 Tools/Languages: C#, ASP MVC, AngularJS, ASP WebApi, WebForms, Visual Studio 2015, MS SQL Server
- 2014–2015 **Senior Software Engineer (contract)**, *HM Informatik AG*, Remote
 Worked on the Flight Control Simulator (FCS) project.
 Tools/Languages: C++, Boost, CMake, Qt 4.8, Visual Studio 2010, Bazaar.
- 2011–2014 **Director & Chief Architect**, *Momentum Hub*, Maidenhead
 Owned the solution end-to-end as Director, Chief Architect and Head Developer.
- 2010–2011 **Senior Software Engineer**, *Symantec*, Reading
 R&D Team, Enterprise Vault for Lotus Domino
- 2006–2010 **Software Engineer & Team Lead**, *Ingres*, Slough
 Various customer projects, managing the full sw life cycle.
- 2004–2006 **Software Engineer & Team Lead**, *Thinking Instruments AG*, Ilmenau, Germany
 Bespoke software projects for various customers.

Education

- 1996–2003 **Diplom Informatiker (M.Sc.) in Computer Science and Mathematics**, *Technische Universität Ilmenau*, Ilmenau, Germany
 Awarded Oct. 2003

Certifications

- Nov. 2024 AWS Certified Developer - Associate — Credential ID 04DJLNBL2JF11E3T
- Oct. 2020 AWS Certified Solutions Architect - Associate (lapsed) — Credential ID NJQ3VMXLCFREQSC7
- Mar. 2020 Microsoft Certified: Azure Solutions Architect Expert (lapsed) — Credential ID H394-0016
